

## **6-84 THERMOPLASTIC TRAFFIC STRIPES AND PAVEMENT MARKINGS**

Thermoplastic traffic stripes (traffic lines) and pavement markings shall conform to the provisions in Sections 84, "Traffic Stripes and Pavement Markings," of the 2010 Standard Specifications and these special provisions.

The State Specification No. for glass beads in Section 84-2.02, "Materials," of the Standard Specifications is amended to read "8010-21C-22 (Type II)."

Thermoplastic material shall conform to the requirements of State Specification No. 8010-21C-19.

Thermoplastic material for traffic stripes shall be applied at a minimum thickness of 0.07-inch.

Cattracking by Contractor shall consist of placing spots of paint not more than 3 inches in width and not more than 5 feet apart along the line established per plan and reviewed by the Engineer. Paint shall be used for cat tracks, and dribble lines are not acceptable.

Contractor shall identify existing parking stalls and re-install existing parking stalls per plans. Contractor shall have Engineer review parking stall cattracking prior to installing permanent striping.
